

Center for Therapeutic Riding of the East End
10 years
CTREE HORSES CHANGING LIVES
SUMMER *news* EDITION

Meet Our New CTREE BOD President *Sherryl Jackson-Bruyn*

"It is extraordinary to observe the passionate commitment among the riders, our horses, and our staff. Wonderful things happen every day!"

Sherryl has been a CTREE board member since 2012 in addition to being instrumental in developing our annual 5K race. She is a lifelong resident of Southampton and lives there today with her husband Wayne, her daughter Olivia, and her dog Lucy. Sherryl recently retired after thirty-five years of teaching as a Speech/Language Pathologist. Combining her love of horses with her passion to help children achieve their goals makes CTREE her happy place.

Welcome also to new directors: Lena DeSantis, Dr. Allison Van Arsdale and Chris Ritchey

Lena DeSantis

Dr. Allison Van Arsdale

It takes a very special horse to be chosen for the CTREE Equine Team. We first heard of Paco from his owner, Lori McGarva who told us how her son used to ride him home from the school bus stop! He came to us from practically our backyard...East Hampton! Paco has been trained in both English and Western riding disciplines and at 10 years old is the baby of the herd! He enjoys being turned out on the grass fields next to his other CTREE buddies.

Strategic Planning

CTREE Directors Initiate Strategic Planning

Our board, staff and invited stakeholders engaged in a two-day strategic planning process for CTREE. Strategic planning

enables us to function from an intentional plan and acts as a roadmap for realizing our vision. The collaboration resulted in clear goals for the organization. These goals and the objectives to achieve them will guide CTREE forward.

If you would like to learn more about CTREE's strategic plan, please contact managing director, Karen Bocksel (631) 779-2835

- Goal I Establish site location to accommodate program growth
- Goal II Develop resources to support center sustainability & growth
- Goal III Engage board in expanded leadership & governance roles
- Goal IV Increase the capacity of program services
